

Mojo4Life takes our proven “straight-through process” model to a new level of automation and accuracy. Now an unlimited number of Application Packets can be processed to a consistent turnaround time, no matter their size.

Onboarding New Business Reinvented with Mojo:

- **Security:** The Shredded Data model removes context, eliminating NPI or PHI.
- **Accuracy:** The Powerful combination of Machine Learning and multiple layers of human validation deploys a Six Sigma quality.
- **Speed:** Mojo utilizes Azure’s service fabric platform to gain on-demand scaling capability.
- **Economics:** Mojo eliminates the need for facilities, human resources, security, training and more.

Turnaround time is your competitive advantage

Overview:

- Mojo’s machine learning technology digitizes, transcribes, and interprets 50 plus data fields supported by human verification to achieve true accuracy.
- Clients avoid typing, indexing, in favor of having Mojo automatically file both data and images into the PaperClip Virtual Client Folder document management system.
- Mojo saves case managers valuable time by fully integrating with popular agency management systems for case creation.
- Return valuable time to case management professionals to what they are good at, servicing and processing new business.
