

# Mojo4Medicare

*Mojo4Medicare takes our proven “straight-through process” model to a new level of automation and accuracy.*

Clients enrolling Medicare patients face unique processing challenges due to the short enrollment period. To significantly boost efficiency and exceed deadlines, we have enrolled the power of Mojo to create a specialized solution called **Mojo4Medicare**.

Now turnaround time becomes your competitive advantage.

## Make open enrollment period the same as any other day:

- **Security:** The Shredded Data model removes context, eliminating NPI or PHI.
- **Accuracy:** The Powerful combination of Machine Learning and multiple layers of human validation deploys a Six Sigma quality.
- **Speed:** Mojo utilizes Azure’s service fabric platform to gain on-demand scaling capability.
- **Economics:** Mojo eliminates the need for facilities, human resources, security, training and more.

## Overview:

- Mojo’s machine learning technology digitizes, transcribes and interprets 50 plus data fields supported by human verification to achieve true accuracy.
- Clients avoid typing, indexing, in favor of having Mojo automatically file both data and images to supporting systems.
- Mojo saves case managers valuable time by fully integrating with popular agency management systems for case creation.
- Removes the need for touch points, allowing case managers to focus on servicing and processing new business.
